# JUMO MAERA S25

## Level probe

### Applications

#### Level and level measurements<sup>1</sup>

- In rainwater cisterns
- In gray water recycling
- Heating oil and diesel oil tanks
- In AUS32 (known in Europe as "AdBlue®", "DEF" in North America, or "ARLA 32" in Brazil)

### Brief description

The JUMO MAERA S25 level probe is used for the continuous hydrostatic level measurement of liquids. Filling heights between 2.50 mWS and 10 mWS (water column) can be achieved in ventilated tanks.

When the level probe is immersed into a liquid, a liquid column emerges above the probe. The liquid column increases as the probe is immersed deeper into the liquid and creates a hydrostatic pressure on the measuring system by the force of its weight. The measured pressure is transferred as a standard signal. The signal is linearly proportional to the rising liquid column.

Any variations in air pressure are automatically compensated for using a protective hose and the surrounding pressure is therefore taken into account.

Further information on our level probes from the JUMO MAERA series can be found in the brochure "Level probes – Hydrostatic level and level measurement" in the documentation.

Type 401015 with process connection 707

### Customer benefits

#### Economic

The standardized, constructive design and constant optimization of the production process result in an excellent price-performance ratio of the level probe.

#### Process-reliable

The core of the level probe is a piezoresistive measuring cell, which features high overload resistance and is particularly safe, reliable, and temperature resistant. Each level probe is tested in a fully automated measuring and calibration facility to ensure consistently high product quality. A reverse-polarity protection mechanism protects the measuring instrument against damage, ensuring maximum safety during startup.

### Special features

- Level probe for continual level measurement in liquids
- Measuring ranges: 0.25 bar to 1 bar (2.5 to 10 mWS)
- Medium temperature 0 to 50 °C
- Piezoresistive silicon sensor
- Accuracy: 0.3% MSP<sup>2</sup> (linearity)
- Sensor technology proven thousands of times over
- Reverse-polarity protection mechanism
- Suitable for indoor installation

<sup>1</sup> These recommendations are based on many years of experience; however, in individual cases they may not be fully applicable. We would be happy to provide further information, including regarding additional applications.

## Electrical connection

For this construction, a stranded PVC cable is encased in an application-oriented protective hose made from either PE or PA.

To prevent moisture penetrating into the protective hose, in this case the pressure equalization hose, the delivery includes a hose end piece with the fitting materials.

Protective hose	
Material	PE, PA <sup>a</sup>
Color	Natural (PE + PA, not UV resistant) <sup>b</sup> , black (PA, UV resistant)
Outer diameter	8 mm
Bending radius	Approx. 120 mm It is vital to take into account that if the protective hose is kinked or pinched, this will prevent ambient pressure compensation.
Admissible medium temperatures	0 to 50 °C (depending on the medium and the level probe)
Yield stress	
PE protective hose	10 M Pa
PA protective hose	22 M Pa

<sup>a</sup> Depending on the version ordered

<sup>b</sup> The non UV-resistant cable is not suitable for outdoor use.

## Accessories

Item	Description	Part no.
Terminal head for pressure compensation Tank cover mounting	<p>The terminal head is only suitable for application in the level probe variant JUMO MAERA S25 (type 401015).</p> <p>It is used to mount the level probes cost-effectively and in the best possible way. Protection type IP 67 is achieved.</p> <p>By using it locally with the tank mounting or wall mounting versions, a rapid pressure compensation can be achieved and the length of the special cable can be minimized. The costs are thereby reduced as an electric standard cable can be used as the outgoing cable from the terminal head.</p> <p>Furthermore, the direction (for example to the control cabinet) can be individually specified.</p>	00602743
Wall mounting		00602744

## Scope of delivery

Item	Description
Hose end piece	<p>With this device, a standard cable is encased in a protective hose suitable for the application. The hose end piece prevents the hose, which is used as a pressure compensation hose, from being cut off or bent, for example when being routed through a wall. The hose end piece may be used for example in routing through walls in masonry, clamp or cutting ring fittings in a tank, or cable glands in a control cabinet.</p> <p>The hose end piece is supplied with the device.</p>
